

## **Mission statement Foundation Hope Haiti 2020/2021**

### *Background*

Since 2011 Jacqueline van de Weerd has been working as a humanitarian nurse in Haiti, relying solely on donations to sustain her work. The way Jacqueline lives, relates, and interacts with the people in Haiti makes her an ideal medical professional on the ground for the foundation. The Foundation Hope Haiti is happy to partner with her to support her work and current projects, and in addition, support future aid workers and future projects.

### *Aim/Goal*

The goal of the Foundation Hope Haiti is to support humanitarian aid in Haiti. It will support aid workers to enable them to live and work in Haiti. The money raised by the foundation will exclusively be used to support the goal of sustainable humanitarian aid. Specific donations will be used as specified by the donor.

In addition to supporting aid workers the foundation will manage the school project, baby milk project and future projects in an honest, transparent manner.

### *Mission Statement*

“We don’t just live for ourselves” is our mantra and we want to make that visible by using our personal knowledge and talents to help others.

### *Vision*

The Foundation Hope Haiti feels the social and Christian obligation to aid the most vulnerable and aims to give hope and provision for a better future. This aid is personal and on a micro level, financial or medical, short term or long term.

### *Activities*

The foundation has a fundraising committee whose aim it is to raise the adequate funds and services to enable the foundation to reach its goal. Fundraising can be done by selling products and organizing fundraising events. It is also important to raise monthly donations to create a stable financial platform to support the Foundations projects.

In 2021 the Foundation hopes to develop its projects further. With aid workers on the ground in Haiti, the projects will remain personal, insightful and relevant.
